Capabilities Statement

Mount Pleasant Mine Service LLC was established in 1986 in Mount Pleasant, Pennsylvania. Our company provides custom metal fabrication, welding, and metal products to a variety of industries. We have the tools to make one-off specialty metal parts or mass-produce parts to meet a customer's needs.

Mount Pleasant Mine Service LLC has a variety of machines including shears, benders, brakes, plasma table, drills, saws, line bore machine, mig, tig, and stick welders. These machines are used to make parts found in precast concrete structures, hospitals, parking garages, mining equipment, conveyor systems, truck beds and trailers, railings, handrails, and so much more. We have the ability to handle heavy metal welding and fabrication or make parts with large quantities to meet customer needs.

Core Competencies

- Welding
- Metal Fabrication: Heavy, Structural, Mining, Embedment, Truck Beds, etc.
- Bending and Rolling
- Rebar Cutting and Bending
- Hole Drilling
- Plasma Cutting
- Metal Parts and Materials
- Sales of Steel, Aluminum, Stainless, Welding Supplies, Hydraulic Hose & Fittings

Differentiators

Mount Pleasant Mine Service LLC is a family-owned business doing custom metal fabrication for over 30 years. Some of our metalwork can be found in multiple professional stadiums, hospitals, and several parking garages throughout the northeast United States. We have six certified mig and stud welders. When taking on a new job we like to provide samples to ensure our customers are getting a product they are expecting. Our company caters to customers' needs to meet tight deadlines.
